## Summary

---

UI/UX Designer and Frontend Developer with a strong foundation in design systems, prototyping, and responsive web development. Skilled at translating user research into intuitive interfaces using Figma, HTML, CSS, and JavaScript. Google UX Certified and experienced in usability testing, accessibility (WCAG 2.1), and working within Agile teams. Adept at collaborating cross-functionally with developers, product managers, and stakeholders to deliver human-centered design solutions. Seeking to contribute to creative digital teams building impactful and inclusive user experiences.

## Technical Skills

---

- **Design & UX:** Figma, Adobe XD, Design Systems, Prototyping, Accessibility (WCAG), Heuristic Evaluation, UX Research, User Personas, User Flows, Wireframes, Journey Mapping
- **Frontend Dev:** HTML5, CSS3, JavaScript (ES6+), Tailwind CSS, Responsive Web Design
- **Tools:** Git, GitHub, JIRA, Confluence, Slack, Postman, Google Analytics, Chrome DevTools
- **Methodologies:** Design Thinking, Agile, Scrum, Lean UX, A/B Testing
- **Soft Skills:** Collaboration, Communication, Attention to Detail, Problem Solving, Curiosity, Feedback-Driven

## Certification

---

**Google UX Design Specialization**  
Google

Dec-2024

## Experience

---

### Software Developer

Jan 2022 - Aug 2022

Royal Technosoft • Ahmedabad, India

- Designed low to high-fidelity wireframes and built responsive UIs using Figma, React.js, and Tailwind CSS
- Translated complex design requirements into accessible, mobile-first web layouts across desktop, tablet, and mobile.
- Collaborated with developers and product managers using Agile workflows, tracking tasks in JIRA and documenting components in Confluence.
- Conducted usability testing with internal users, refining designs based on feedback and accessibility.
- Improved UI performance through layout optimization and semantic HTML, supporting WCAG 2.1.

### Data Science and Business Analytics Intern

Apr 2021 - May 2021

The Sparks Foundation • Singapore (Remote)

- Analyzed business data using Python, SQL, and tools like Power BI and Tableau.
- Identified key patterns and trends to support strategic decisions and process improvements.
- Used Google Analytics to assess user behavior and track web engagement metrics.
- Delivered actionable reports that helped prioritize KPIs and boost customer interaction.
- Gained hands-on experience in data cleaning, visualization, and forecasting outcomes.

## Education

---

**Web Development – Post Graduate Certification | GPA: 3.6/4**

Conestoga College • Kitchener, ON

Jan 23 – Apr 24

**Bachelor of Engineering (Computer Engineering) | CGPA: 7.9/10.0**

Gujarat Technological University • Ahmedabad, India

Jul 18 – May 22

## Extracurricular Activities

---

### Community Volunteer

BAPS

- Managed technical setup and AV systems at community events.
- Maintained event data records and contributed to technical planning.
